Market Performance

The Amman Stock Exchange experienced a six-day trading session this week, running from Saturday through to Thursday. The week started off positively, with the General Index rising to end its first day of trading at 7,911.4 points. The Index declined briefly on Sunday before rising to its peak for the week on Monday, closing at 7,914.1 points, the highest closing point achieved by the Index since it dropped below its 8,000 point support line two weeks ago. The week was weighted towards speculative trading and an overall selling momentum to realise profits.
